

Non-woven geotextile (PP, PP/PES)

Usage:

- Construction of paved and unpaved roads, land stabilization,
- Construction of railroads,
- Drainage ditches,
- Surface drainage for sport fields,
- Mechanical protection of waterproof membrane,
- Construction of landfills and ashes,

-Woven geotextile (PP, PET, PE)

Usage:

- Reinforcing post foundation,
- Railways and roads embankments,
- Construction of roads and railways,
- Retaining structures,

Geogrids for soil reinforcement (PP, PET)

Usage:

- Construction of roads and railways, soil stabilization,
- Retaining walls and structures,
- Segment walls,
- Construction of embankments,

Geogrids and geo composites for asphalt reinforcement

Usage:

- Construction of paved roads,,
- Repair and maintenance of paved roads.

Bentonite geo composites

Usage:

- Waterproof of slabs and walls below ground level,
- Overlay the bottom of landfill,
- Pools.
